DETAILED ACTION

1. Claims 1-14 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (U.S. Patent No. 5,701,478).
- 4. Regarding claim 1, Chen teaches a computer system substantially as claimed comprising: initialization memory (ROM 41) containing initialization code [col. 4, lines 20-25]; a processor coupled to said initialization memory for executing said initialization code [col. 4, lines 20-25]; and
- a static random access memory (SRAM 112) coupled to said processor for use in executing said initialization code [col. 4, lines 26-28].
- 5. Regarding claim 6, since the claim recites method of operating of the apparatus defined in the apparatus claim, it is rejected accordingly based on the rejection of the apparatus claim.

Art Unit: 2185

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 2-5 and 7-14 rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (U.S. Patent No. 5,701,478).
- 8. Regarding claims 2 and 3, Chen teaches the BIOS program of the ROM 41 is loaded into SRAM 112 for execution [col. 4, lines 26-29]. In other words, Chen teaches the SRAM is assigned addresses of the addresses assigned to the ROM. One of ordinary skill in the art would have readily recognized that Chen may also teach the SRAM is assigned addresses overlaying only a portion of the addresses assigned to the ROM.
- 9. Regarding claims 4, 5, 7 and 8, Chen teaches the system including DRAM (DRAM 44) coupled to the processor [Fig. 5]. Chen does not explicitly teach the initialization code is for initializing said DRAM. One of ordinary skill in the art would have readily recognized that the initialization code used for initializing DRAM is part of BIOS code. Therefore, it would have been obvious to use Chen's existing SRAM to load only DRAM's initialization code for initializing DRAM.
- 10. Regarding claims 9-14, Chen teaches a system substantially as claimed, comprising: dynamic random access memory [DRAM 44];

initialization memory (ROM 41) containing initialization code for initializing BIOS program at system start up [col. 4, lines 20-25]; and

Page 3

Art Unit: 2185

s static random access memory (SRAM 112) functional at system start up [col. 4, lines 26-28].

Chen does not explicitly teach the initialization code is for initializing said DRAM. One of ordinary skill in the art would have readily recognized that the initialization code used for initializing DRAM is part of BIOS code. Therefore, it would have been obvious to use Chen's existing SRAM to load only DRAM's initialization code for initializing DRAM at system startup.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan N. Du whose telephone number is (703) 308-6292 or via e-mail, **thuan.du@uspto.gov**. The examiner can normally be reached on Monday-Friday: 9:00 AM - 5:30 PM, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on (703) 305-9717.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.

Any response to this action should be mailed to:

U.S. Patent and Trademark Office P.O. Box 2327 Arlington, VA 22202.

The fax number for the organization is (703) 872-9306.

Hand-delivered responses should be brought to:

Art Unit: 2185

Crystal Park II 2121 Crystal Drive Arlington, VA 22202 Fourth Floor (Receptionist).
